PREVENTING CRIME
BEFORE IT HAPPENS

VIRTUAL GUARD®

THE FUTURE OF SECURITY

Virtual Guard® specializes in delivering effective and reliable high-tech security solutions, designed to PREVENT crime from taking place.

WHO WE ARE

- ★ Over 15 years experience in video monitoring security.
- ★ Perimeter protection specialist for auto dealerships.
- ★ Security surveillance with video analytics.
- ★ Monitoring security operations is supervised by former Lieutenant Colonel in the national Israeli Police.
- ★ Proprietary technology as used by the Department of Homeland Security.
- ★ A turnkey system, operating throughout the U.S. and Canada, with its own command center, installation units and technology development. No aspect of the company's operation is out-sourced.
- ★ Virtual Guard® is the only security company approved by Fiat Chrysler Automobiles (FCA) and only 1 out of 60 such approved vendors overall! We went through rigorous inspection before FCA was willing to approve offering its security services to dealerships through its Market Center. Said inspection included technology, financial and background check of principals.

IDEAL FOR

- ★ CAR DEALERSHIP SECURITY
- ★ WAREHOUSE SECURITY
- ★ COMMERCIAL BUILDINGS
- ★ UTILITY INFRASTRUCTURE
- ★ CONSTRUCTION SITES
- ★ COMMUNITY ASSOCIATIONS
- ★ MULTI-FAMILY HOMES
- ★ INDUSTRIAL SITES

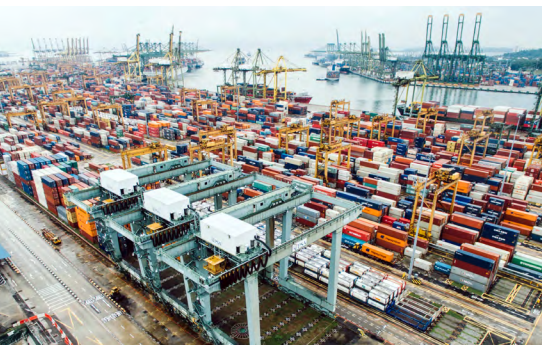

VIRTUAL GUARD®

THE FUTURE OF SECURITY

Virtual Guard® provides a wide range of security services that are aimed at providing you with one thing: PEACE OF MIND.

WHAT WE DO

- ★ Protect high dollar inventory and assets on public display and interior spaces.
- ★ Prevent property damage from theft, vandalism and graffiti.
- ★ Reacting to intruders in real time, activating live communication (“hey you, with the red shirt- leave or we call the police!”).
- ★ Following strict situational protocol for response to all threats.
- ★ Set the cameras on the perimeters, allowing our security to get to the perpetrator early and deter the potential crime sooner.
- ★ When reporting to police, we stay on the line helping them locate the perpetrator with the aid of our cameras (“he’s hiding in the green car in the corner”) until they actually make the arrest.
- ★ Specific guards for specific locations: we allocate guards’ assignments to the same locations, so they are familiar with the client’s habit and routines of the site, providing better, more efficient security (such as knowing where the cleaning crew enters from, delivery truck path, etc.).

IDEAL FOR

- ★ INDUSTRIAL MANUFACTURING SECURITY
- ★ ESTATE PROTECTION
- ★ MARINA MONITORING
- ★ SELF STORAGE FACILITIES

VirtualGuard®
INTELLIGENT GUARDING SOLUTIONS

OUR "SPECIAL SAUCE"

- ★ **Customized Solutions:** because we own the software, and have our own development department, we can provide customers with specific features unique to their needs.
- ★ **Camera health monitoring:** we spend 30% of development funds and significant time in confirming daily that all cameras are operating properly (obviously, we can't protect the site when cameras are down).
- ★ **Due to our proprietary software,** we can integrate any i/p cameras our clients already have, saving them significant expense.
- ★ **Part of our standard operating procedure,** we conduct a daily "camera reference": comparing current camera view to the first day the camera was installed (perfect view). If it is different, we take the proactive measure to initiate a service call, sometimes without even client knowledge.
- ★ **Police response time:** 99% of alarms are false, so police normally take their time in responding. When we call the police, they respond immediately knowing we have a "verifiable crime" that is happening 'right now'.
- ★ **Our "System for Life" maintenance program** is an option that guarantees that as long as the client continues to use the Virtual Guard® program, all parts and labor are covered by us, including replacing failed equipment with better, present-day technology equipment. With this program, the client will never have to buy equipment again.

PRESENTS

VIRTUAL INSPECTOR[®]

CUSTOMER SAYS:

"THE SCRATCH WASN'T THERE!"

VIRTUAL INSPECTOR[®] SAYS:

"LET'S FIND OUT"

INTRODUCING: VIRTUAL INSPECTOR®

2 DRIVE THROUGH ARCHES WITH 4 HD CAMERAS ON EACH.
Plus one license plate recognition camera.

Brand New
Time-Saving
Cost-Reducing
Technology

8 HD CAMERAS
That always tell the truth.

VirtualGuard®
INTELLIGENT GUARDING SOLUTIONS

IS THE CUSTOMER ALWAYS RIGHT?

Maybe, but let's make sure.

WHY VIRTUAL INSPECTOR?

Has a customer ever complained to you about a scratch 'he didn't have' before bringing the car for service, or worse, of vandalism performed on his car while under your care? Are you enjoying this aspect of customer service? If not, keep reading.

We take this whole concern off your capable hands so you can focus on what you do best: Servicing cars!

WHAT DOES THE VIRTUAL INSPECTOR DO?

- ★ Literally takes a movie of the car just as it is dropped it off for service.
- ★ License plate is photographed as recognition.
- ★ Stores the visual files on the cloud.
- ★ Keeps the files for two years to ensure compliance with statute of limitation issues.
- ★ Takes care of all customer complaints concerning the body's condition prior to service.
- ★ *Your crew is involved in none of these issues.*

REMEMBER: CAMERAS NEVER LIE,
AND THEY NEVER CALL IN SICK!

INTELLIGENT GUARDING SOLUTIONS

HOW MUCH DOES IT COST TO INSTALL?

- ★ Doesn't cost anything to install. Virtual Inspector is provided as a service, charged on a monthly basis.

HOW DOES IT WORK?

- ★ Each of your service lanes is equipped with two (2) arches, one on each side.
- ★ Four (4) megapixel cameras are mounted on each arch, providing complete view of car.
- ★ One additional camera (recognition camera) is set to capture license plate.
- ★ See illustration for visual demonstration.

WHO WE ARE

- ★ Over 15 years experience in video monitoring security.
- ★ Perimeter protection specialist for auto dealerships.
- ★ Security surveillance with video analytics.
- ★ Monitoring security operations is supervised by former Lieutenant Colonel in the national Israeli Police.
- ★ Proprietary technology as used by the Department of Homeland Security.
- ★ A turnkey system, operating throughout the U.S. and Canada, with its own command center, installation units and technology development. No aspect of the company's operation is out-sourced.
- ★ Virtual Guard® is the only security company approved by Fiat Chrysler Automobiles (FCA) and only 1 out of 60 such approved vendors overall!

OUR 'SPECIAL SAUCE'

- ★ We service cameras and ensure full operational condition at all times, at no additional cost to you.
- ★ We created both hardware and software for Virtual Inspection, so any upgrade rolls on to you, at no additional charge.
